LITHO-SCORE/CS ■
A new development for the offset press, Litho-Score/CS has no sharp, square edges that risk cutting heavy stock. Its wider, rounder scoring edge helps minimize cracking and is excellent for heavy-coated and uncoated stocks, cast-coated paper, and jobs where scoring through solid coverage is required.

LITHO-PERF/CS ■

Offering the same perforating performance as the standard, side-aligned Litho-Perf, Litho-Perf/CS has center-mounted teeth for increased pressure and longer runs. This is currently the only center-mounted rule available that is heat-treated using Boyd's time-tested methods for extended life.

MICRO-PERF/SS ■

With 30-, 40- and 50-tooth blades, Micro Perf is ideal for perforating continuous feed forms, offering a perforation line that remains clean. The blades are available in a blade height of .022 inch, designed for use on paper or lightweight card stocks. Use Micro-Perf for jobs that will pass through a laser printer after being perforated.

LITHO-SCORE / WideTrac ■

The new Litho-Score WideTrac has no sharp, square edges that risk cutting the heavier stocks. Its wider, rounded scoring edge helps minimize cracking and is excellent for heavy coated and uncoated stock, cast-coated paper, and jobs where scoring over solid coverage is required.

LITHO-PUNCH ■

Litho-Punch creates a punched circular cut that remains lightly attached for removal by the end user. It is available in 1/8", 3/16", 1/4", 3/8", 1/2", 1", 1 1/4", and 1 1/2" diameters. A serrated or straight-cut edge may be used -- available for both paper and card stocks.

When ordering, specify punch hole size and paper or card.
